FIELD GUIDES

Larger size, more detailed field guides. 4 1/2" x 7 1/2"

BIRDS OF NORTH AMERICA, 360 pgs., ISBN 1-58238-090-2, \$15.95

ROCKS & MINERALS: A Guide to Field Identification, 280 pgs., ISBN 1-58238-124-0, \$14.95

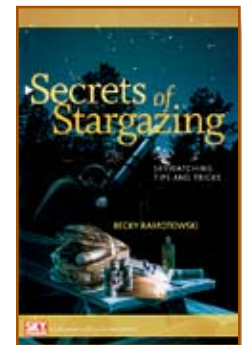

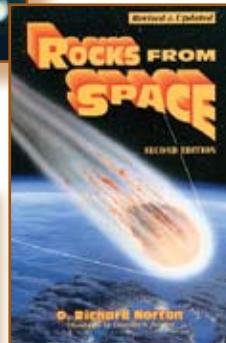

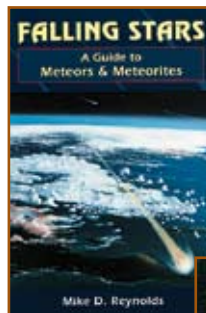

Astronomy

FALLING STARS: A Guide to Meteors and Meteorites, Reynolds. A look at all aspects of meteors and meteorites, including how and where they originate, when and where to watch, and how to classify, collect and preserve them. Covers meteor showers, craters and tektites in detail with lists on organizations, dealers, museums and references. 160 pgs., ISBN 0-8117-2755-6, \$15.95

STARGAZING: What to Look for in the Night Sky, Van Holt. Handy guide to basic astronomy for anyone who spends time outdoors at night. Practical and concise guide with entertaining information and illustrations that apply science, history and myths to observing and understanding the sky at night. 112 pgs., ISBN 0-8117-2934-6, \$10.95

ROCKS FROM SPACE: Meteorites and Meteorite Hunters, 2/E, Norton. Popular, illustrated guide to cosmic debris. Introduces the fascinating world of meteorites, asteroids, comets, and impact craters. 467 pgs., ISBN 0-87842-373-7, \$32.00

PETERSON FIRST GUIDES: Astronomy, Pasachoff. Pocket guide with photographs and simplified descriptions of the stars, planets, sun, moon, comets and meteors. Includes full-color maps showing the positions of the stars. 128 pgs., ISBN 0-395-93542-3, \$5.95

SECRETS OF STARGAZING: Skywatching Tips and Tricks, Ramotowski. The perfect book for recreational stargazers. Loaded with practical advice to help new observers spend more time exploring the night sky and less time fumbling with equipment, or wondering how, when, and what to observe. Learn how to plan your observing sessions and record your observations, quickly and easily prepare your telescope for a night under the stars, stargaze in the city despite the lights, and much, much more. 98 pgs., ISBN 978-1-931559-40-9, \$13.95

BINOCULAR STARGAZING, Reynolds. Many stargazers assume they must invest hundreds or even thousands of dollars in equipment before they can enjoy the wonders of the night sky, when all you really need is a simple pair of binoculars. This handy guide explains how to choose binoculars and use them to observe everything from comets to solar eclipses. 224 pgs., ISBN 0-8117-3136-7, \$12.95
